ELITE  
FUTURE AMAZING

## MAXIMUM FUNCTIONALITY WITH STYLE.

The ELITE series has been created for high-performance control environments offering an orderly integration and protection of the equipment, with a modern and very stylized design, giving a very pleasant visual without strident and tiring designs.

## HUMAN FACTORS.

In all our consoles we provide the interface between technology and people. In control centre environments ergonomics are more important than ever, that is why our control consoles not only meet but exceed ergonomic and comfort guidelines.

## FUTURE PROOF.

We know that today's technology evolves and is upgraded tomorrow. The design of the ELITE consoles allows future updates & expansions with the minimum disruptions.

## PERSONALITY

"There is nothing more exciting in the world of design than solving needs in a simple and elegant way."

*Xavier Isart*

## CABLE MANAGEMENT

A professional and integrated cable management that protects and hides the wiring inside the structure, providing easy access through the console, while giving you the versatility to expand and contract easily.

## AVANTGARDE DESIGN

Modern and avantgarde design to fit any control room environment, contributing a nice visual without estridences.

## TECHNOLOGY INTEGRATION

Not just an empty box. ELITE series offers a big range of accessories for a superior cable management and technology integration.

## ERGONOMICS

Designed to the advanced ergonomic and functional position requirements of the operator, ELITE series enhance the health and productivity of operators within the control room.

# DESIGN & MANUFACTURE IN BARCELONA

## ANY SPACE — ANY SHAPE

ELITE series smart and modular design offer an unlimited design configurations to fit in any control room without losing any of the product features.

## MADE TO LAST

Designed for 24/7 lifetime use, with durable design and strong materials that combined offer a strong product to last in the toughest environments.

## DESIGN

From a piece of paper to the control room. A design is successful when it improves the existing and provides solutions for the future.

## FUTURE PROOF

Technology evolves. Our consoles too. ELITE series is highly modular that fits your needs today, and allows you to adapt to future changes.

## LED LIGHTING

The different LED lighting points and lines on the consoles give the control room a very dynamic and modern look while helping operators move and interact with each other quickly and efficiently.

## ANY SPACE...

With the ELITE series we offer infinite possibilities of configurations thanks to a smart modular design. ELITE consoles can be integrated in any control room being a perfect solution combining an avant-garde design, high durability and ergonomics. ELITE consoles can be manufactured for both single operator and multiple operators, for any space and in any shape.

## ...ANY SHAPE

### CONFIGURATIONS

**Straight, curved, U-shaped,  
L-shaped ...**

Unlimited configurations to fit any control room.

# CABLE MANAGEMENT

The ELITE consoles series provides clear pathways from top to bottom, flowing hidden and safely through the different parts of the console without interruptions.

The cable solutions provided under the work surface and equipment cabinets guides cables through the console directly to the PCs, power, and data connections.

Regardless of the type of equipment that is integrated into the consoles, the ELITE series offers different storage options. From the integration of lighter technology to the storage of large equipment. Inside the cabinets, the equipment can be placed both on pull-out trays or fixed in 19" frames.

## SIDE CABINET

Ideal when there is few or small equipment or there is restricted space between rows of consoles in the room. With a capacity of up to 2 CPU towers, it also allows the installation of 19" equipment, with a maximum height of 11U. Always equipped with ventilated doors and security keys.

# EQUIPMENT STORAGE

## BACK CABINET

The back equipment cabinet offers a high load of equipment and structured cabling, thanks to the different wiring ducts placed on the sides and top. All these accessories have several mounting positions, adapting to the individual requirements of each project.

The CPU towers are installed in pull-out trays to facilitate access and installation. In addition, this cabinet can be equipped with one or two 19" frames for rackable equipment.

**E.LITE**  
FUTURE AMAZING

All ELITE series equipment cabinets have natural convection ventilation, through perforated areas in the doors and in their structure. Optionally, for the extraction of heat generated by higher density equipment, the cabinets can be equipped with low noise fan units controlled with digital thermostat.

## COOLING

**ELITE**  
FUTURE AMAZING

Quick access to the connectivity dock, both for the operators personal use and the console's general connectivity.

## CONNECTIVITY

The ELITE series provides different areas for the installation of power and data sockets, both for equipment and for operators personal connectivity. The equipment cabinets provide vertical and horizontal areas for the installation of PDUs. Always with a secure and well-organized wiring.

# ADJUSTABLE CONSOLES

The ELITE\_AIR series is the SIT-STAND console that allows operators to adjust the height to their needs to sit or stand while they work.

Taking a standing position occasionally promotes better posture that helps prevent back pain and helps the operator use different muscles in the body. This way operators can stay focused on their operations.

The immediate benefits of using sit-stand consoles are:

- \_ It adapts to different body types.
- \_ Operator height adjustable.
- \_ Prevents back tensions and other muscle aches.
- \_ Activate blood circulation.
- \_ Cost-effective.

# ELITE\_MEET

FUTURE AMAZING

## MEETING DESKS

Integrating technology while express your company's style and philosophy.

The ELITE\_MEET series allows the safe and professional integration of any type of technology, for dynamic and efficient sessions. From simple meeting and collaboration tables to sophisticated technology tables for war rooms and command centers. Its intelligent design allows a safe and correct installation of wiring throughout the entire table.

The crisis tables allow the installation of monitors and retractable microphones and any type of connectivity bars for the use of the attendees.

The design of the ELITE\_MEET is continuous with the entire ELITE series and also allows the creation of any shape and finishes, however unique. Round, square, rectangular, U-shaped or V-shaped tables, any type of table can be designed to adapt to each meeting or crisis room.

## AUXILIAR FURNITURE

The ELITE series is completed by a group of auxiliary products to complete any corner of a control centre.

## ERGONOMY

Ergonomics in control centres is one of the main factors to be considered. That's why all the SPF consoles, fixed or sit/stand, standard or customized, not only meet, but exceed the ergonomic guidelines.

SPF products and solutions comply with the UNE-EN 527-2 :2017 (Office furniture – Work tables – Part 2: Safety, strength and durability requirements) and UNE-EN 11064-04:2013 (Ergonomic design of control centres – Part 4: Layout and dimensions of workstations).

# MATERIALS & FINISHES

## BUILT TO LAST IN THE TOUGHEST 24/7 ENVIRONMENTS

SPF consoles are designed to last. Quality & durability is one of our focus when creating a product. That's why ELITE series are made of strongest materials which combined with a smart design makes a highly durable product.
